

Supporting document for declaration of compliance

Certificate of compliance with regulations for paper in contact with food

Customer: Savon Sellu Ltd.

Product: Fluting

We have obtained from the producer detailed information concerning raw materials and additives. We have also analysed the fluting sample using methods which are listed in appendix 1.

Based on our investigations, we consider the above fluting grade to comply with the following regulations in terms of its chemical composition:

- European Parliament and Council Regulation (EC) 1935/2004/EC
- European Parliament and Council Directive 94/62/EC (amendment 2004/12/EEC)
- Regulation (EC) No 1907/2006 of European Parliament and of the Council, and its amendment Commission Regulation (EC) No 552/2009; phthalates in toys and childcare articles
- Commission Regulation (EC) No 2023/2006
- Law concerning the revision of the foodstuffs and animal feed legislation of updated version 15 December 2010, §§ 30 and 31, Germany
- BfR recommendation no. XXXVI, 1 March 2011, Germany
- FDA regulations, 21 CFR, parts 170-189, 1 April 2011, USA
- EN 71-3:1994/A1:2000 Safety of Toys: Migration of certain elements
- EN 71-9:2008 Safety of toys. Organic chemical compounds
- EN 13432:2001, Annex A. Table A.1. (Packaging. Requirements for packaging recoverable through composting and biodegradation.)

Samples of the fluting were tested sensorically. Based on the results the fluting tested would not be expected to bring about a deterioration in the taint characteristics of food being in contact with the fluting. According to the odour tests the odour of the fluting was relatively distinct.

Based on our investigations we consider the fluting grade equal to the tested sample, in respect of its chemical composition is suitable as packaging material for both dry and non-fatty as well as moist and fatty foods.

Appendix 1

In contract work 121415 (Certificate of compliance with regulations for paper in contact with food) used test methods

EN 1230-1: 2010, Sensory analysis*: Odour

EN 1230-2: 2010, Sensory analysis*: Off-flavour

EN ISO 15320: 2003*, PCP

EN ISO 15318: 1999*, PCB

EN 1541: 2001*, Formaldehyde

EN 1104: 2005, Transfer of antimicrobial constituents

Metals, SCAN-CM 54:1997 and internal methods, partly accredited methods

Phthalates, Internal method

* Accredited method
